Raketu's Intros Ultra-Low Rate Calling Schemes

By [Jyothi Shanbhag](#), TMCnet Contributing Editor

Global Internet communications and social networking player [Raketu](#) has come up with ultra-low rates calling schemes, which it claims to work out much cheaper when compared to other providers in the market.

ANNOUNCING

SWITCHVOX SMB 4.0

Defining Web-Aware Unified Communications

www.digium.com/switchvox

Raketu offers users with either free or discounted national and international calls from any computer and mobile anywhere in the world. Using Raketu's website [RakWeb](#), users can even get access to IPTV ([News - Alert](#)), video on demand, IM, SMS, multi media player, podcasting, slide show and info feeds instantly.

Their latest ultra-low rates scheme includes three calling plans: \$2.95 for 1000 minutes to company's free calling zones, \$4.45 for 1500 minutes to company's free calling zones, or \$9.95 for unlimited calling to company's free calling zones.

Raketu's free calling zones include locations in over 46 countries around the world. Plans are valid for one month from activation, and are subject to the Raketu Fair Use Policy. There are no hidden costs or additional connection charges

Raketu makes it simple and easy for users by allowing its access via [any Mobile phone](#), any Desktop, Download, Web site, widgets, SMS-Texting, Roaming data, Dialup, WiFi ([News - Alert](#)) or Broadband.

"Raketu has by far the lowest rates when compared with other providers. As an example, if a user makes a ten minute call to the US, using Skype this will cost them 28.5 cents US, using Raketu it will cost them only ten cents US, representing a savings of over 65 percent," said Greg Parker ([News - Alert](#)), president and CEO of Raketu.

He further added, "Similarly, a ten minute call to a mobile in London, UK, using Skype ([News - Alert](#)) will cost them \$2.96, and using Raketu will cost them only \$1.89, a savings of over \$1 -- that's over \$6 for a 60 minute call!"

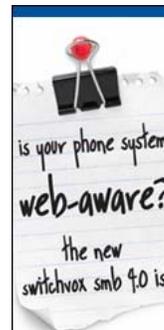

Raketu's calling plans details can be accessed from this link [Raketu's ultra-low rates](#)

Raketu develops peer-to-peer IP applications that provide communications, information, media and social networking services for consumers and for business.
